Best smartphone game of all time. Waiting for the other 3 2 - Card Thief & Miracle Merchant.. The text was very slow and couldn't be sped up or skipped. Everything looked very complex in the very beginning and made me want to avoid it all. Controller didn't work right. You could probably play with it but things like "press the "A" button to continue but it was actually left on the dpad" would make it very difficult to figure out.. I'd love to review it if I would only find it. it's supposed to be already in my Steam library, but at this point I'm giving up.. Short, but worth the price. I have 4.7 hrs on record and went through it twice to get all the achievements.. It's not really a game for me. I don't recommend. GTA with clowns.
10/10. The game is fun at first, especially with friends. However after playing it for a couple hours, there are easy tricks to identify the Imposter and Crewmen. The longer u play, these tricks get abuse to easily weed out the killer and it makes the game repetitive and not as entertaining. An easy fix to this is maybe allowing the imposter to do task similar to crewmen. This giving the name Imposter a more soild role.. Great game if you were a fan of the Hero Quest board game!

I've got over 600 hours using other animation programs such as Maya or Source Film Maker.

That being said, this program is brilliant.

At the start I had no clue what to do, but there's a load of help videos aswell as a document to teach you aspects of the program. Only took a few minutes before I had something decent made. The rigs were useful too, as they made animating much easier.

It is brilliant for making animated sprites in a video game. I'd recommend it at full price, even though I got this for 75% off.. Very nice explicating game (isn't a full game). Only played single player. It was fun, slightly above average shooter considering the added character of the Aliens and Predators. The story is straight out of a comic book, its cliché... c'mon, you're either here because Aliens: Colonial Marines shot itself in the foot with its Pulse Rifle and you want to shoot some Xenos with a Predator or two are sprinkled in or you came for the multiplayer which at this point is kinda dead. All in all, a fun time, not great, but miles away from bad.. I was waiting for this games release and when I finally had seen the early access was available I jumped to steam and glanced the reviews and payed \$10.00 just to play an unfinished demo.
